4 workflows + analytics

Engagement, review,
billing and risk-scoring,
plus forecasting

1 source of truth

Every client, entity,
obligation and invoice
linked together

Built for 4 territories

GST/TDS/ROC,
VAT/CT/ESR, ACRA, US
filings — versioned rule
packs

Live in weeks

We migrate your client
sheets, calendars and
document trackers

WHY FIRMS SWITCH

The problems your team deals with every day

Most firms run on a mix of spreadsheets, WhatsApp threads and one senior person's memory. Here is what that costs — and how 10x Compliance fixes each problem.

PROBLEM

Deadlines tracked in spreadsheets

- ✓ Due dates computed by a rules engine from versioned, jurisdiction-scoped rules — not a cell someone forgot to update.

PROBLEM

Documents lost in WhatsApp chats

- ✓ Every request becomes a tracked item with a due date, a status and a full history per client.

PROBLEM

Renewals remembered too late

- ✓ Alerts fire at configurable lead times, checked against the actual rule — not a generic reminder.

PROBLEM

No visibility into who's overloaded

- ✓ A capacity view across staff and engagements, before busy season buries someone.

PROBLEM

Clients asking "where do we stand?"

- ✓ A tiered client portal — signatories, finance contacts, read-only viewers — see live status themselves.

PROBLEM

Chasing overdue invoices by hand

- ✓ A configurable dunning ladder escalates automatically, with every step logged.

PROBLEM

Review comments scattered everywhere

- ✓ Maker-checker built into the workflow itself, with one event log — not five inboxes.

PROBLEM

Every new country bolts onto the same sheet

- ✓ Territory-scoped rule packs — India, UAE, Singapore, US — inside one tenant-isolated system.

ONE CONNECTED PLATFORM

Ten modules, one record for every client

Every module shares the same data. A client's engagement knows its obligations, an entity knows its rule pack, and every filing ends up on the right invoice automatically.

1 Clients & Entities

- Firms, clients, entities
- Effective-dated relationships
- Multi-country structures

2 Intake & Deals

- Enquiry & lead capture
- Proposal & fee quote
- Won / lost pipeline

3 Engagement & Onboarding

- Engagement letter (e-sign)
- KYC & document checklist
- Jurisdiction tagging

4 Compliance Calendar

- Every obligation, one calendar
- Due dates from the rules engine
- Internal target vs statutory date

10x Core

Clients · Entities · Obligations · Documents
Roles, audit trail, alerts

5 Work & Delivery

- Task queue by engagement
- Review escalation
- SLA & ageing

6 People & Roles

- Staff directory & roles
- Capacity & utilisation
- Maker-checker permissions

7 Rules Engine

- Versioned, jurisdiction-scoped rules
- Period-end + offset + exceptions
- Confirmed vs proposed status

8 Billing & Collections

- Invoices, fees, VAT/GST
- Dunning ladder & escalation
- Firm & entity-level ledgers

9 Client Portal

- Signatory / finance / read-only tiers
- Document upload & e-sign
- Status visibility, no chasing

10 Documents & Audit Trail

- Document register per entity
- Maker-checker on sensitive actions
- Full event log on every transition

WORKFLOW A · ENGAGEMENT LIFECYCLE

From enquiry to filed, without a missed step

Each stage opens the next task automatically, so nothing depends on someone remembering it.

Obligation · GST-3B-2026-09

DEMO DATA

Kaveri Foods · India entity
GSTR-3B · Monthly return · Sep 2026

Rule

R-IN-GSTR3B v2026.07

Period end

30 Sep 2026

Due (computed)

20 Oct 2026

Status

IN PROGRESS

Due in 22 days. 2 of 3 required documents received; purchase register still pending from client.

File now

View rule

Documents (2/3)

⚡ What happens automatically

- Missing KYC documents block the engagement until uploaded
- The due date is computed from the assigned rule pack, never typed in
- A reminder fires at the configured lead time before the statutory date
- Documented exceptions (like India's March-TDS override) apply on their own
- Filing logs the event and notifies the client portal instantly
- The next period's obligation opens the moment this one is filed

WORKFLOW B · REVIEW & SIGN-OFF

From a document request to a filed return

Example: a GST return needs a purchase invoice from the client. Here is who does what, and what the system handles for them.

Client	Receives request Portal or WhatsApp, with a due date	Confirms & uploads Or clarifies what's missing
Associate	Prepares the return Drafted from documents on file	Flags gaps Missing items highlighted before filing
Manager	Reviews the draft Checked against the rule and documents	Escalates or approves Sent back, or up to the partner
Partner	Signs off & files Above the materiality threshold	Sees it logged Full trail on the client's record

Documents · GSTR-3B · Sep 2026			DEMO DATA
DOCUMENT	REQUESTED	RECEIVED	STATUS
Sales register	01 Oct	02 Oct	RECEIVED
Purchase register	01 Oct	—	OVERDUE
Bank statement	01 Oct	03 Oct	RECEIVED
E-way bill summary	05 Oct	—	PENDING

⚡ Control built in

- Filing can't be marked complete with required documents outstanding
- Only a role holder can approve above the materiality threshold
- SLA timers escalate to the manager when a review runs late
- Every approval and edit is logged with who and when
- A missed internal target flags before the statutory date passes

WORKFLOW C · RULES ENGINE

Know every obligation for every entity

Each statutory rule gets a versioned, jurisdiction-scoped record. Every due date is computed from it, and every exception is documented — never guessed.

1 Register

Jurisdiction, service, entity type and version recorded, effective-dated.

2 Assign

The rule pack links to each entity through its own effective-dated relationship.

3 Compute

Due dates derive from period-end plus offset — nothing typed in by hand.

4 Except

Documented exceptions override the general formula, never silently.

5 Confirm

A partner marks each rule confirmed for the firm before it's relied on.

6 Track

Every instance of a recurring obligation keeps its own filing history.

Rule · R-IN-TDS

DEMO DATA

TDS Payment & Return · India · v2026.07

CONFIRMED

due = period_end(month) + 30 days
exception: March → fixed 30 April

Worked example — period ending 31 Aug 2026 → **due 30 Sep 2026**.
March period is the documented exception, moving to 30 April instead of the usual offset.

PERIOD	DUE	FILED	STATUS
Jul 2026	30 Aug	28 Aug	ON TIME
Aug 2026	30 Sep	—	OPEN
Mar 2026	30 Apr	29 Apr	EXCEPTION APPLIED

March is not "30 days after quarter." The general TDS formula would place March's due date in April by the standard offset — but the March return is separately due on 30 April by rule, a documented exception applied automatically every year, not a formula stretched to fit.

WORKFLOW D · BILLING & COLLECTIONS

Every fee in, every follow-up out, fully logged

Retainers, per-filing fees, VAT/GST and multi-currency invoices in one ledger, with overdue accounts chased automatically instead of by a partner's phone call.

Fees in

- 1 Schedule**
Fee plan created from the engagement — retainer or per-filing
- 2 Invoice**
Generated per entity, VAT/GST applied by jurisdiction
- 3 Collect**
Payment links, bank transfer references, online payment

Escalation out

- 1 Reminder**
D+3 automatic, friendly nudge
- 2 Escalate**
D+7 manager notified, D+15 partner notified
- ✓ Client statement**
Fees, payments and balance, live in the portal

● ● ● Invoice ledger · September 2026

DEMO DATA

INVOICE #	CLIENT	ENTITY	DUE	AMOUNT	STATUS
INV-2026-0418	Kaveri Foods	India	01 Oct	₹42,500	CLEARED
INV-2026-0521	Zephyr Mobility	UAE	03 Oct	AED 18,000	OVERDUE · DAY 7
INV-2026-0602	Al Noor Trading	UAE	05 Oct	AED 12,600 incl. 5% VAT	SCHEDULED
INV-2026-0447	MyDojo Inc.	USA	07 Oct	\$3,200	HOLD · PAYMENT PLAN
INV-2026-0398	Zephyr Mobility	Singapore	10 Oct	S\$2,450	DEPOSITED

⚡ Compliance handled

- VAT/GST applied per entity's jurisdiction, not one flat rate
- Tax invoices ready as e-invoicing mandates roll out per country
- Separate client-money and firm-fee ledgers
- Full audit trail of every edit and approval

MANAGEMENT DASHBOARD

Your whole practice at 9 a.m.

One screen tells partners what needs attention today, without calling anyone or opening a spreadsheet.

DATA ANALYSIS SERVICE · FILING RISK PREDICTION

See which filings are at risk before they're late

We analyse your own document-collection, review and filing history to score every upcoming obligation for risk, so your team can act weeks ahead instead of at the deadline.

Filing risk · next 30 days				DEMO DATA
CLIENT / ENTITY	DUE	RISK	MAIN REASONS	SUGGESTED ACTION
Kaveri Foods · India	14 Oct	82 HIGH	2 documents missing, associate on leave	Reassign & escalate
Zephyr Mobility · UAE	20 Oct	74 HIGH	Late-document history, new rule version	Partner review early
Al Noor Trading · UAE	05 Nov	51 MEDIUM	First filing under new CT rule	Extra QA pass
MyDojo Inc. · USA	15 Nov	18 LOW	On time last 6 filings, docs complete	Standard track

Staff capacity risk			DEMO DATA
ASSOCIATE	LOAD	WHY	
R. Sharma	HIGH	14 open engagements, 3 due this week	
A. Khan	MED	Review queue growing, 2 late reviews	
S. Verma	LOW	On track, capacity available	

Line up backup review capacity before a key associate is overloaded in peak filing season.

Signals the model watches

- Document lateness pattern per client
- Past filing delays and near-misses
- Rule complexity and recent version changes
- Staff capacity, leave and review backlog
- Entity and jurisdiction risk history

What you get

- Risk score and reasons for every upcoming filing
- Staff capacity flagged before it breaks, not after

DATA ANALYSIS SERVICE · BI & FORECASTING

Know next quarter's compliance load today

Your data turned into live dashboards and forecasts for filing volume, staff hours and billing, with a monthly report written for partners.

FILINGS · NEXT QUARTER

214

38 in India, peak GST season

STAFF HOURS NEEDED

+22%

vs. this quarter's baseline

REVENUE AT RISK · 120 DAYS

\$86K

from at-risk renewals

Figures on this page are sample demo data.

Monthly report for partners

- Practice health: compliance rate, overdue, renewals
- Risk watchlist: filings and staff at risk
- 3 to 12-month forecasts for workload and billing
- Filing volume by jurisdiction and service
- Effective vs. statutory date variance
- Plain-English summary with recommended actions

How it is delivered

- 1 Live dashboards**
Inside 10x Compliance, or Power BI if you prefer
- 2 Monthly PDF pack**
Emailed to partners and management
- 3 Quarterly review**
Walkthrough of findings with our analyst

CONNECTED & SECURE

Works with the systems you already use

Tax & e-invoicing portals

GST, VAT, ACRA — subject to each authority's API

WhatsApp Business

Document requests, reminders

Payment gateways

Cards, bank transfer, direct debit

Accounting software

Tally, QuickBooks, Zoho, Xero

Client & document portal

Uploads and status, tiered access

E-signature

Engagement letters and renewals

Email & SMS

Notices and statements

Power BI & Open API

BI exports and your own tools

Who uses it

Partners	Dashboard, approvals, reports
Managers	Review queue, capacity, escalations
Associates	Task queue, document requests
Billing / Accounts	Invoices, ledgers, statements
Clients	Self-service, tiered portal access

Security & data

- Hosted with each region's data-residency needs in mind
- Tenant isolation — one firm's book never touches another's
- Role-based access and two-factor login
- Full audit log and daily backups
- Multi-currency, multi-language ready
